APHES 2018 — Summer course

Objectives: To familiarise health professionals with epidemiological techniques to assess the health impacts of disasters and conflicts on affected communities.

Applicant profile: Middle-career professionals with training in public health, medicine, emergency response or related topics. Experience desirable in the humanitarian and emergency management sectors.

Practical information: Course fee covers coursework, printed materials, coffee breaks and lunches and a certificate of attendance from the Université catholique de Louvain.

Upon acceptance, participants will receive an invoice to be paid within one month; otherwise, participation will be cancelled. No reimbursement is possible for cancellations made after June 15, 2018.

Registration: Download the application form from the website www.aphes.be or request by email contact@aphes.be

Deadline: May 31, 2018

Fees: € 1,750 (discount available for NOHA and EMMPHID students, and UCL Alumni)
